1964 Aston Martin DB5 Manual RHD

Chassis number: DB5/1629/R

Registration Number: VL176DV (Austrian) 5736PP (UK)

Engine Number 400/1622

A simply immaculate example in perfect order throughout. Please be sure to view the underside photographs to see how good this car is underneath. The car was first supplied in June of 1964 via Eton Garages of Slough.

The car comes to us from a prominent Austrian collection of high end cars all in impeccable perfect condition. The car may be viewed or inspected by prior appointment in Austria.

The car is finished in a flawless light champagne metallic paint which simply cannot be faulted. To the interior is original light tan leather in really fine condition with just a light patina of use.

The car sits on four chrome borroni wheels with three ear spinners as noted in the

order sheet when new, along with a heated rear screen & motorla radio with poer operated rear aerial. The factory notes also state that the clutch was converted from Borg & Beck to Laycock.

A good history file comes with the car with bills totalling many thousands of pounds from Mark Specialists such as Aston Service Dorset. Since arriving in the collection a program of subtle improvements has been undertaken with particular regard to the underside to put the car into a condition not dissimilar to when it left the factory. An original Buff UK log book also comes with the car along with the UK V5c. The original unfilled out Aston Martin Guarantee also comes with the car
