VEHICLE DETAILS

ADDITIONAL INFORMATION / SERVICE HISTORY

1950 Jaguar XK120 OTS Alloy Bodied Race Car

Registration Number: 814YUK

Delivery miles since an open Cheque book built by XK motorsport. This car cost a small fortune to build & was done to the highest specifications.

The high compression engine is bored out to 3.6 Litres & sports triple Webber twin choke side draught carburettors. The Cylinder head is gas flowed & ignition fully mapped resulting in an impressive 340 BHP output. This combined with the lightweight custom aluminium body makes for a very very rapid machine indeed.

Further features include: full retrim in leather with bucket style seats; stainless steel big bore exhaust; uprated gearbox with competition clutch; limited slip differential; uprated suspension and brakes; new wheels and tyres. The car is OK for taller drivers due to the bucket style seats & new pedal arrangement.

Resplendent in brand new black paintwork, burgundy hides & carpets complete the look. The car started life as a LHD example & was converted to ~RHD during the build process. It is road registered & UK road legal. The car is equipped with all the

usual bits such as a roll hoop, aluminium radiator, bonnet strap, aluminium quick fill fuel cap & twin aero screens. The boot still has plenty of space for travel luggage.

Not one for the faint of heart, this car is ready for seriously fast road use where (& probably where not) permitted but will be equally if not more at home on a race track.
